Wastiyyah Development Project

Graduation Project

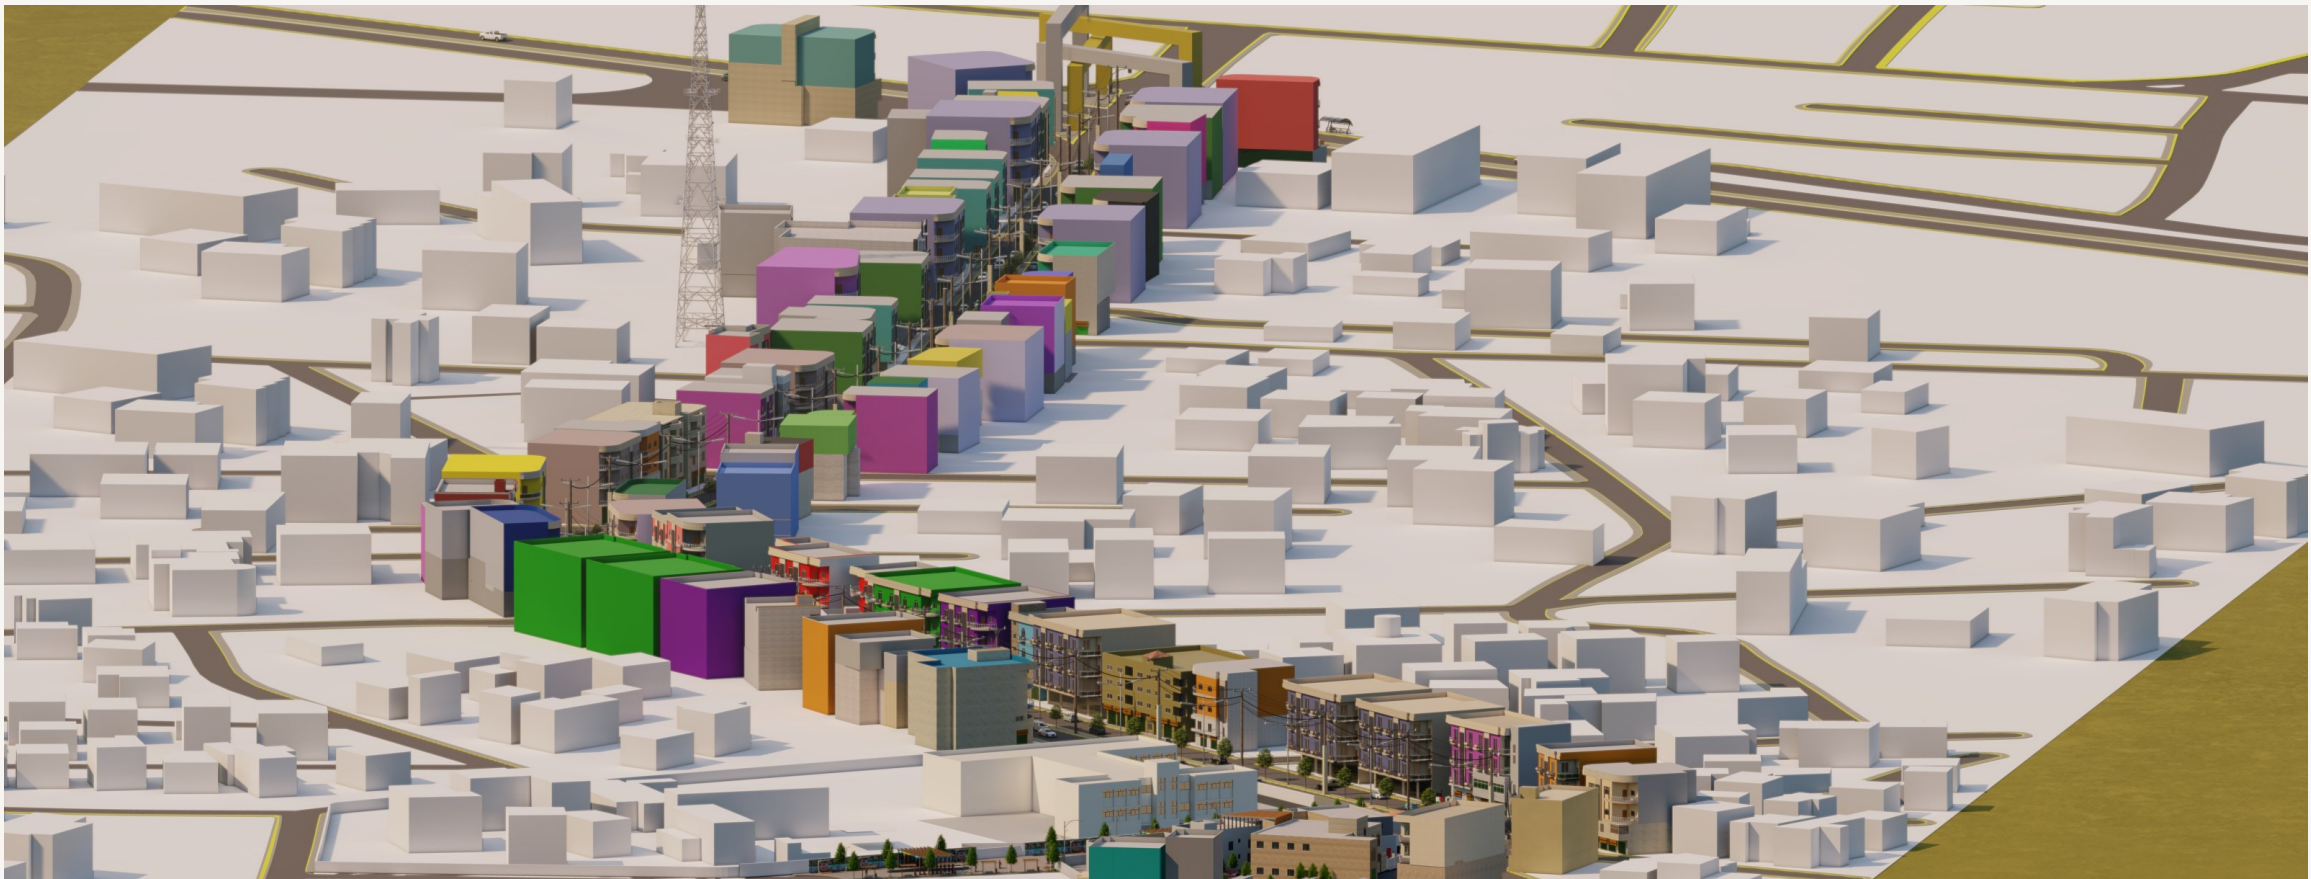

Project Specifications

Project Type	Graduation Project – Urban Development
Site Location	Kufr Asad, Wastiyyah District, Irbid, Jordan
Institution	Al al-Bayt University
Population	Approx. 9,000 residents
Tools Used	Revit, AutoCAD, Lumion, PowerPoint, Photoshop

Project Introduction

This project focuses on revitalizing Kufr Asad, the central hub of Wastiyyah District in Irbid, by enhancing infrastructure, public spaces, and overall quality of life for its 9,000 residents. Through in-depth analysis, the area was divided into two main zones and five individual zones based on street layout and development needs. Key objectives include improving services, traffic flow, and street furniture, while also promoting economic growth, sustainability, and cultural heritage. The project incorporates green spaces, renewable energy solutions, and community engagement to create a more livable and thriving environment.

Zones defined by street layout and development needs.

Al-Mafraq Public Park

Public Park Proposal

Project Specifications

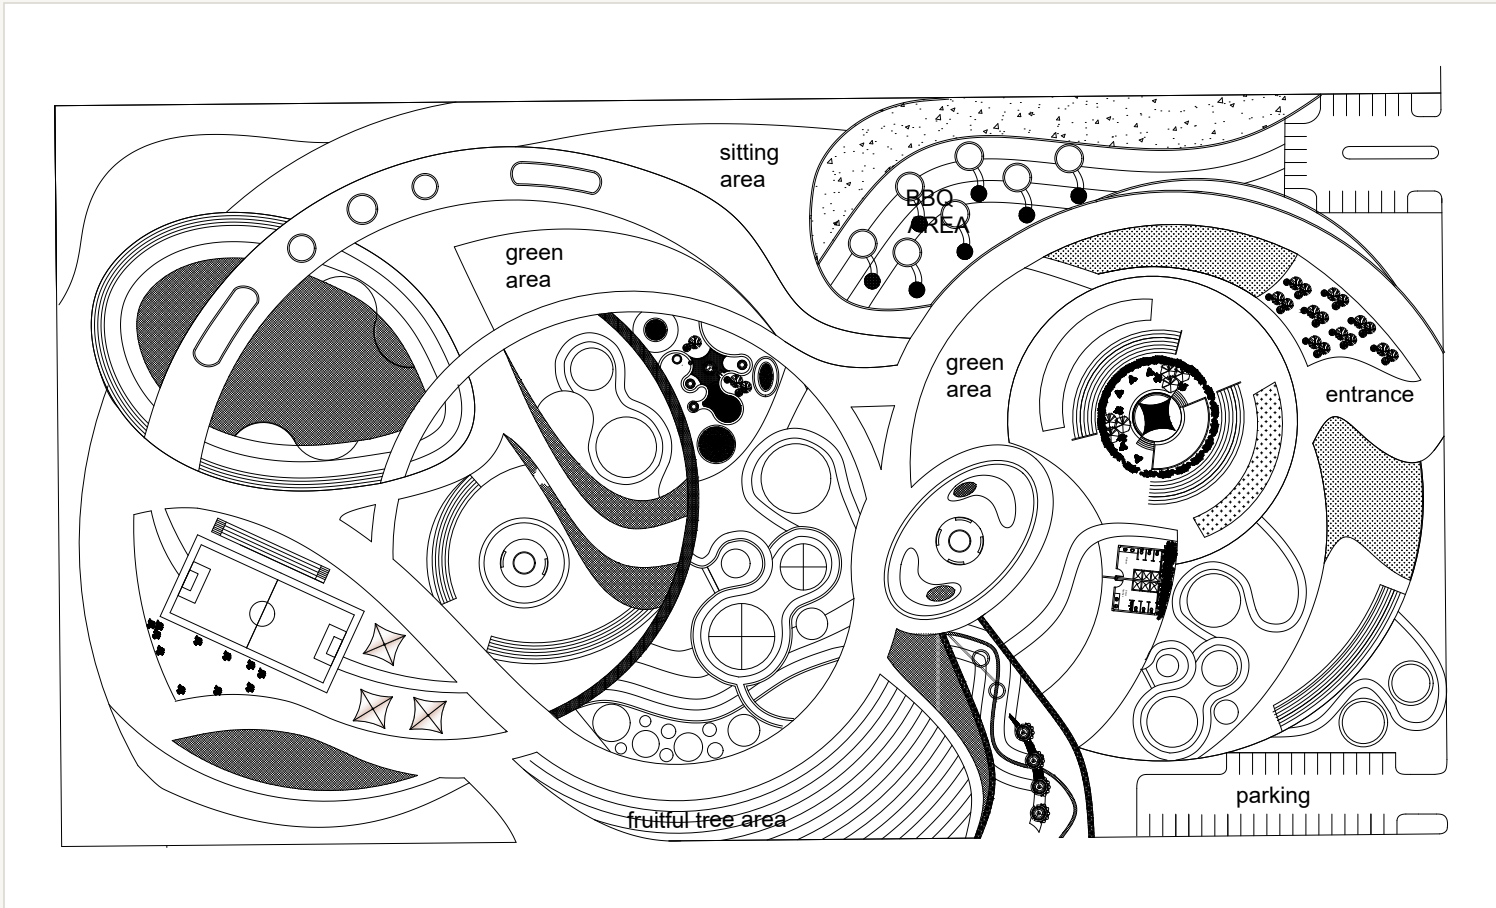

Project Type	Public Park – Landscape & Recreation
Site Location	Mafraq, Jordan
Organization	Municipality of Mafraq (proposed initiative)
Tools Used	AutoCAD, Revit, Lumion, Photoshop

Project Introduction

This proposed initiative by the Municipality of Mafraq focuses on enhancing the recreational and service standards of the city through the design of a public park accessible to all residents. The project incorporates a variety of recreational and sports facilities, along with services tailored to different age groups, ensuring inclusivity and community engagement. By providing diverse amenities, the park aims to improve the quality of life in Mafraq and establish a vibrant urban destination for leisure and social interaction.

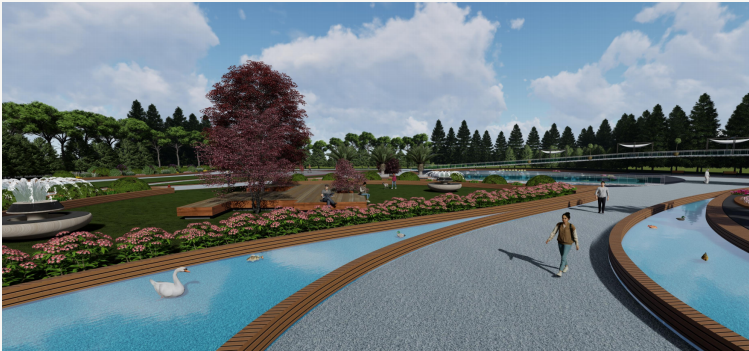

Aerial perspective – pools, pergolas, courts and walking paths

Master plan – entrance, parking, sitting and BBQ areas, green areas, fruit-tree area and sports field

Top view of the park layout

Waterway and promenade perspective

DESIGN PRIORITIES

Recreation & Sport

A variety of recreational and sports facilities.

All Age Groups

Services tailored to different age groups.

Inclusive & Community-led

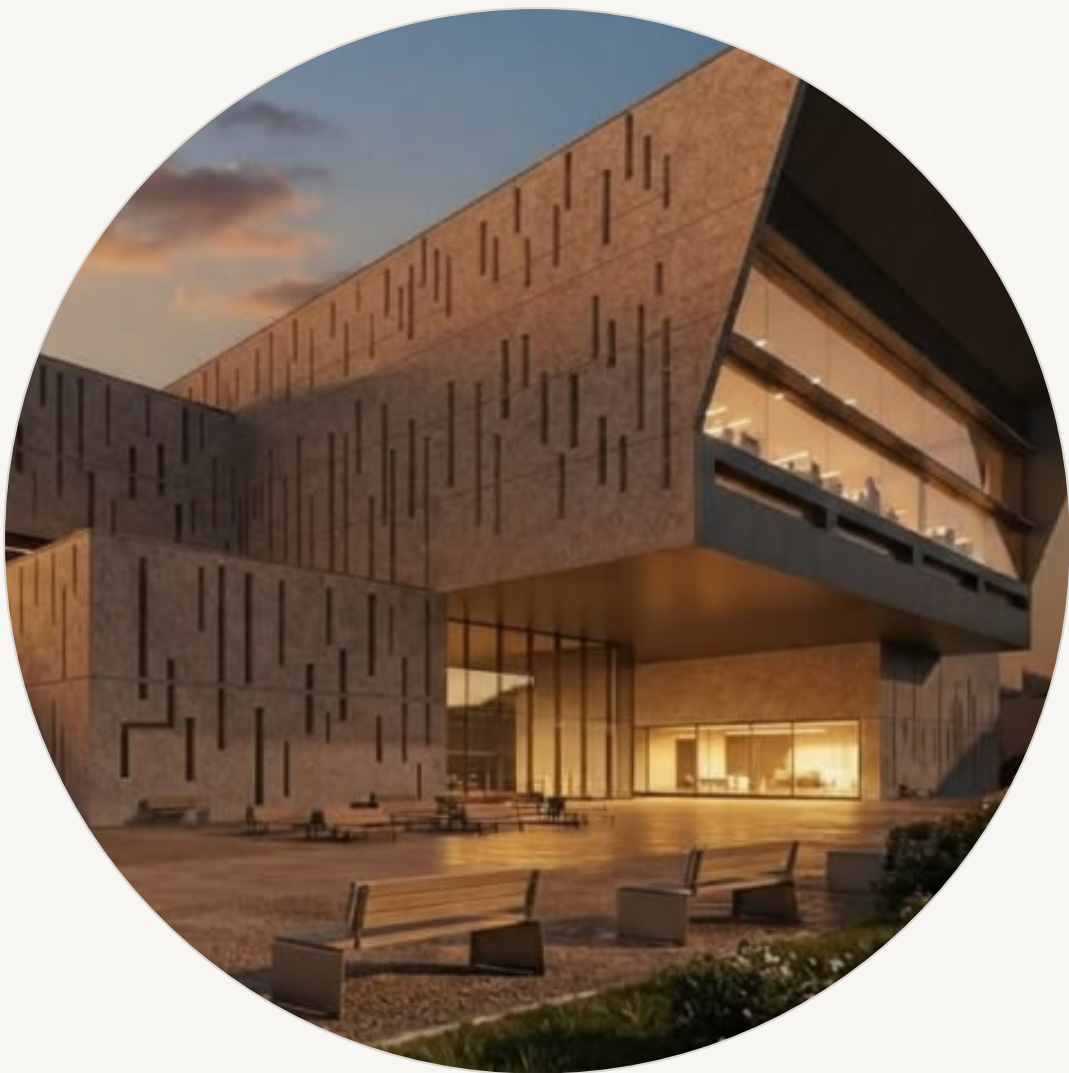

A park accessible to all residents, supporting community engagement.

Urban Destination

A vibrant place for leisure and social interaction.

Hospital Project

Proposed Healthcare Facility

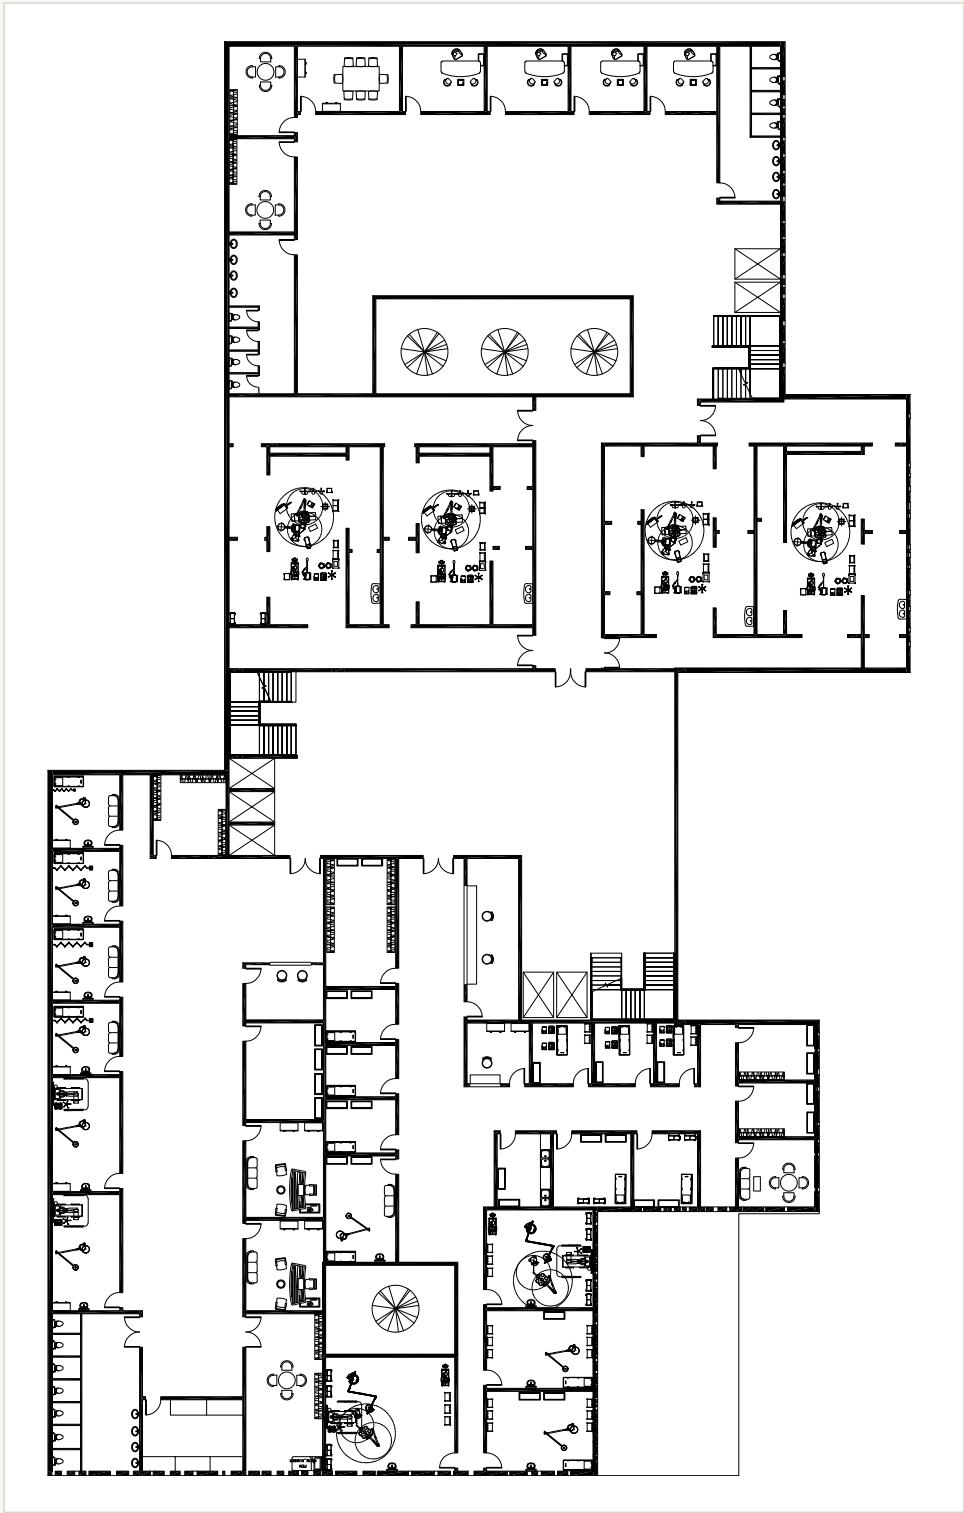

Project Specifications

Project Type	Healthcare Facility – 150 Beds
Site Location	Shafa Badran, Amman, Jordan
Institution	Al al-Bayt University, in collaboration with Al Ahliyya Amman University
Tools Used	Revit, AutoCAD, Lumion, Photoshop

Project Introduction

This proposed hospital was developed by Al al-Bayt University in collaboration with Al Ahliyya Amman University to serve the residents of Shafa Badran by providing a fully equipped healthcare facility. The design accommodates 150 beds, operating rooms, outpatient clinics, an emergency department, and all essential supporting functions. The proposal emphasizes efficiency, accessibility, and modern healthcare standards to meet the growing needs of the community.

PROGRAMME

150
patient beds

- Operating rooms
- Outpatient clinics
- Emergency department
- All essential supporting functions

Private Villa

Construction Drawings

Project Specifications

Project Type	Private Villa – Construction Drawings
Site Location	Na’ur, Amman, Jordan
Plot Area	374 m ²
Project Area	186.9 m ²

Project Introduction

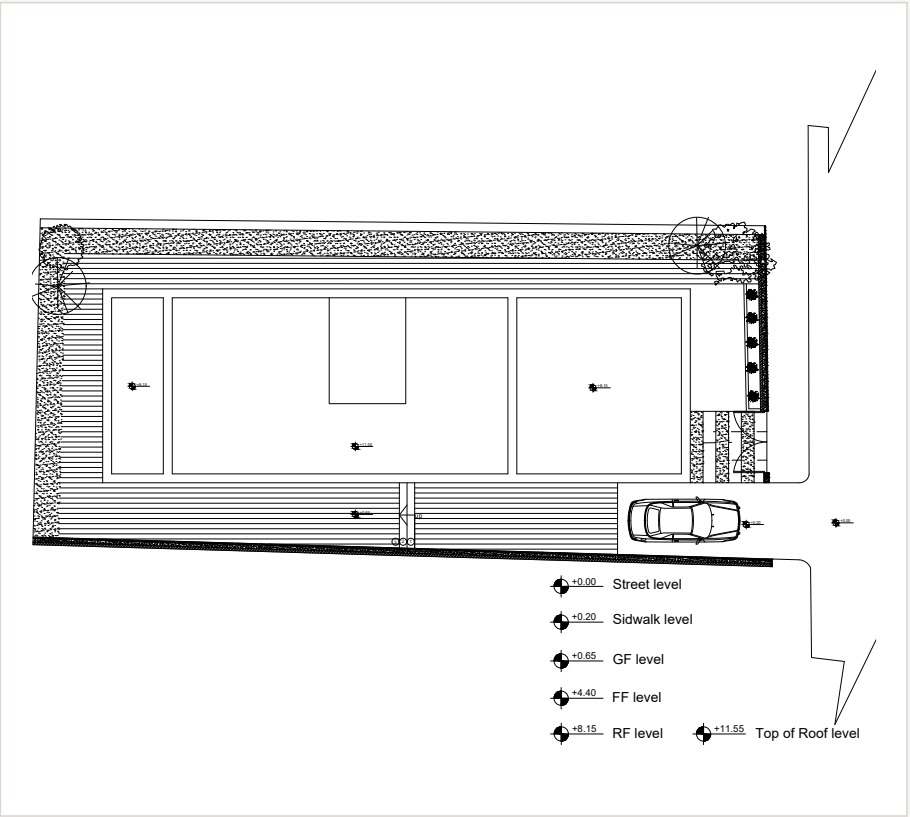

Selected sheets from the construction drawing set for a private villa in Na’ur, Amman. The full 40-sheet package covers the site, drainage and roof plans; floor plans in general, dimension, furniture and notation versions; tiling and ceiling plans; elevations and sections; construction details; and door, window and finishing schedules. This selection shows the ground and first floor plans, a building section, the general site section and the roof build-up detail.

Exterior & Site
